

"I was involved in the NHL playing hockey for 14 years and through that time you get a lot of bumps and bruises. I suffered with pain and swelling and not being able to bend my knee... it was bone on bone. The doctor wanted to do a knee replacement. I bought a device instead and treated myself. Now I have no swelling. I have complete flexibility. I'm pain free."

Barry Gibbs
NHL Alumni

"The Equiscope regenerated my degenerating discs and completely eliminated my pain. This device got me back on the field and allowed me to play my best season yet. I now own a device for myself."

Kameron Loe
MLB Pitcher

ELECTRO EQUISCOPE®

Advanced Health Technology

OFFICIAL PARTNER ENDORSED BY THE
NATIONAL HOCKEY LEAGUE ALUMNI ASSOCIATION

What Pain Can Be Relieved?

- Acute/Chronic Pain
- Sports Injury
- Back Pain
- Neck Pain
- Joint Injuries
- Ligament Injuries
- Muscular Strains/Sprains
- Sciatica
- Fibromyalgia
- Headaches/Migraines
- Swelling/Edema
- Neuropathy

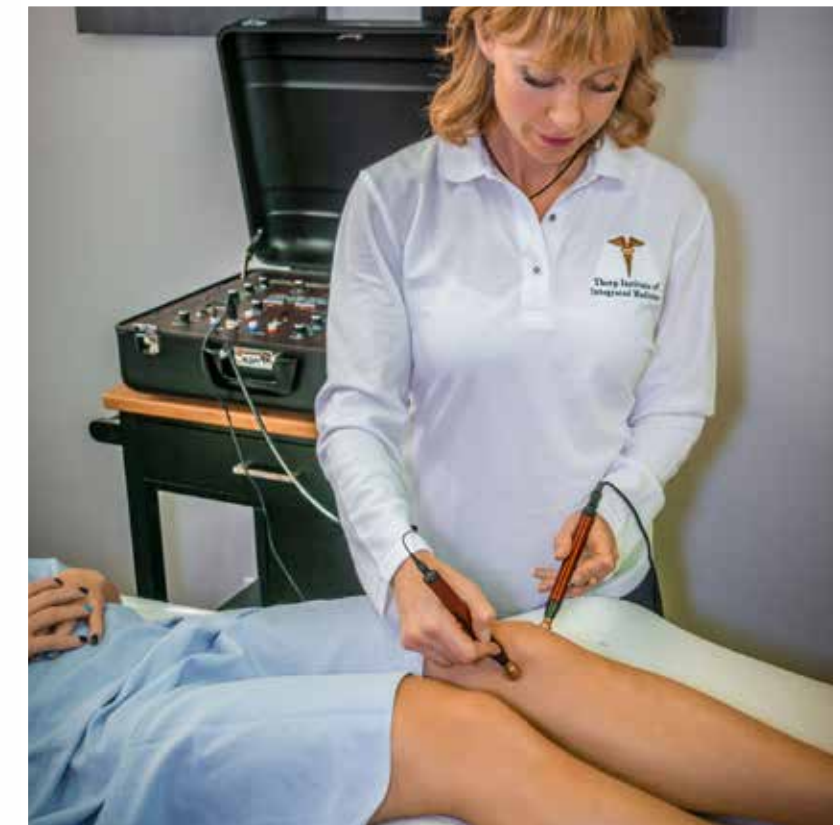

How Does It Work?

The Equiscope uses intelligent microcurrent to autocorrect abnormal electrical patterns in nerve and connective tissues. This therapy is designed to create an optimal healing environment - increasing circulation, decreasing inflammation and relieving pain.

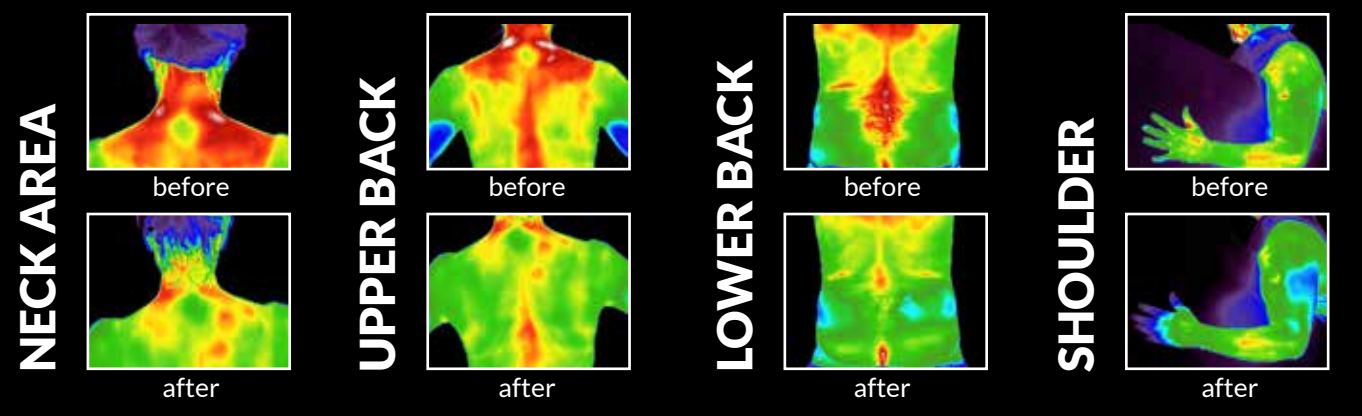

- Non-drug
- Noninvasive
- Pain Free

What to Expect?

You can expect to feel decreased pain, increased flexibility, and often improved sense of wellbeing. These benefits can often be attained within three sessions. Chronic conditions may require additional sessions.

Decreased inflammation after one 30 minute Equiscope session*

* Thermal images provided by Lisa Kalison with Discovery Screening.

Equiscope Therapy is for anyone:

- Wanting to recover faster from surgery, injury or trauma
- Seeking to reduce pain medications
- Who has not experienced success with other therapies
- Who is seeking an alternative to surgery

* Contraindications include pregnancy and pacemaker
